Based on data submitted between week commencing 21/11/16 to 25/12/2017.

Overview Datasheet (Summit)

3. Number of Medication Administration Errors

Based on data submitted between week commencing 21/11/16 to 25/12/17.

*Each Icon represents 5 Medication Administration Errors.

Medication Administration Errors include - Omission (including drugs not available), extra dose, wrong dose, timing error, unprescribed drug, wrong drug, route error, allergy error, deteriorated drug (e.g. exceeded expiry date, crushed when not advised), not signed for.

4. Time Between New Pressure Ulcers

Based on data submitted between week commencing 21/11/16 to 25/12/17. The dotted line to the final point simply indicates that there has not been a pressure ulcer up to the most recent date on which the chart was updated.

New Pressure Ulcers are defined as a pressure ulcer found after 72 hours of admission to your care home or transfer back from hospital).

5. Emergency Admissions to SRFT & Admissions Caused by Falls

*Each Icon represents 5 admissions.

Based on data extracted from SRFT data warehouse between Feb 2016 and Dec 2017. This data also includes admissions from the attached intermediate care units.

Overview Datasheet (Summit)

6. Staff Satisfaction Scores

Of the staff surveyed in all participating collaborative care homes, 64.9% rated themselves as Happy or Very Happy.

Based on data submitted by all units on one week per month between Feb 2017 and Dec 2017. Please note: the number of units submitting each month will vary and this may account for any variation seen.

7. Secondary Measures

There is an average turnover rate* of 2.12 staff per month in your care home.

On average there have been 29.5 staff given extra training per month in your care home.

*Turnover rate is calculated by dividing the number of staff who leave the organisation by the total number employed by the organisation per month and then multiplying by 100 to find a rate.

*Each Icon represents 10 complaints and compliments.
