Haelo HQ, Salford Quays, M50 3SP

9:30am – 4:00pm

Frailty: Living and Ageing Well

This event provides a unique opportunity for system leaders to come together to influence the design and delivery of health and care models in Salford. We know that failure to effectively connect the health and care system has the greatest impact on those who need our services the most.

Participants will:

- Hear from experts in frailty, safety and system leadership
- Connect with teams from acute, social, primary, mental health and community care
- Build a common understanding of frailty, based on data and information from across the Salford health economy
- Share initiatives currently underway to better manage and care for our frail population
- Input into the design and development of new care models

To book your place at this event visit:
